- Wound Healing- acute and chronic wounds
- Diabetic Foot Ulcers and Neuropathy

Female Sexual Health Indications

- Vulvar Vestibulitis Syndrome
- Sexual Dysfunction in diabetic women
- Dryness, low libido, orgasm difficulties
- Dyspareunia

MULTI-WAVE TECHNOLOGY

Multi-Wave is a steady, reliable stream of high-energy shockwaves over an extended treatment area uniquely designed for optimal non-invasive treatment.

Medispec's multiwave stimulates vasodilation as a short-term response and neovascularization (angiogenesis) as a long-term response.

No other shockwave device is designed with multiple reflection points to deliver waves across a deep, large healing zone.

Non-Invasive

Pain Free

Superior Clinical Results

Trusted by doctors worldwide

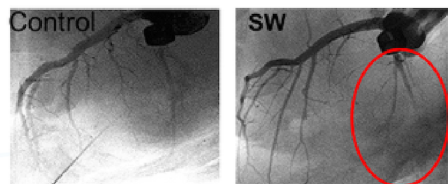

Short treatment time

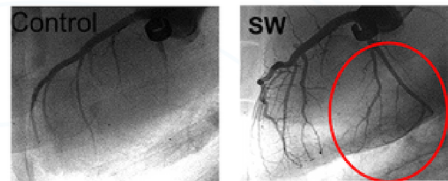

Deep penetration Depth (up to 140 mm)

ANGIOGENESIS

Before Treatment

4 Weeks Post-treatment

Since its founding more than 30 years ago, Medispec has been a leader in the advancement of acoustic wave technologies, initiating new treatments and applications across medical disciplines, providing health and economic benefits to providers and their patients.

LIVE BETTER. LOVE BETTER.
